

Antara Homoeopathy — All API cURLs for Postman

Base URL: `http://localhost:5000`

Replace `{{id}}`, `{{patientId}}` etc. with real IDs from your DB.

HEALTH CHECK

bash

```
curl -X GET http://localhost:5000/api/health
```

DASHBOARD

Get Full Dashboard

bash

```
curl -X GET http://localhost:5000/api/dashboard
```

Get Today's Appointments

bash

```
curl -X GET http://localhost:5000/api/dashboard/appointments/today
```

Update Appointment Status (IN / CLOSED / CANCELLED)

bash

```
curl -X PATCH http://localhost:5000/api/dashboard/appointments/{{id}}/status \
  -H "Content-Type: application/json" \
  -d '{
    "status": "IN"
  }'
```

Get All Holidays

bash

```
curl -X GET http://localhost:5000/api/dashboard/holidays
```

Get Upcoming Events

```
bash
```

```
curl -X GET http://localhost:5000/api/dashboard/events
```

PATIENTS

Get All Patients (default)

```
bash
```

```
curl -X GET "http://localhost:5000/api/patients"
```

Get All Patients (with filters)

```
bash
```

```
curl -X GET "http://localhost:5000/api/patients?page=1&limit=10&search=john&branch=MAIN"
```

Get All Patients — 25 per page

```
bash
```

```
curl -X GET "http://localhost:5000/api/patients?page=1&limit=25"
```

Get All Patients — 50 per page

```
bash
```

```
curl -X GET "http://localhost:5000/api/patients?page=1&limit=50"
```

Get All Patients — search by name

```
bash
```

```
curl -X GET "http://localhost:5000/api/patients?search=ritu"
```

Get All Patients — search by file ID

```
bash
```

```
curl -X GET "http://localhost:5000/api/patients?search=AH-00001"
```

Get All Patients — filter by branch

bash

```
curl -X GET "http://localhost:5000/api/patients?branch=BRANCH_1"
```

Get Single Patient (with appointments + prescriptions)

bash

```
curl -X GET http://localhost:5000/api/patients/{{id}}
```

Create New Patient (JSON)

bash

```
curl -X POST http://localhost:5000/api/patients \
-H "Content-Type: application/json" \
-d '{
  "firstName": "Ritu",
  "lastName": "Sharma",
  "gender": "FEMALE",
  "dateOfBirth": "1995-06-15",
  "phone": "9876543210",
  "email": "ritu@example.com",
  "address": "123 Main Road, Surat",
  "bloodGroup": "B+",
  "branch": "MAIN",
  "occupation": "Teacher",
  "reference": "Dr. Mehta",
  "maritalStatus": "MARRIED",
  "education": "B.Ed",
  "note": "Allergic to penicillin",
  "age": 29
}'
```

Create New Patient with Profile Image (multipart)

bash

```
curl -X POST http://localhost:5000/api/patients \
  -F "firstName=Ritu" \
  -F "lastName=Sharma" \
  -F "gender=FEMALE" \
  -F "dateOfBirth=1995-06-15" \
  -F "phone=9876543210" \
  -F "email=ritu@example.com" \
  -F "address=123 Main Road, Surat" \
  -F "bloodGroup=B+" \
  -F "branch=MAIN" \
  -F "occupation=Teacher" \
  -F "reference=Dr. Mehta" \
  -F "maritalStatus=MARRIED" \
  -F "education=B.Ed" \
  -F "age=29" \
  -F "profileImage=@/path/to/photo.jpg"
```

Update Patient (JSON)

bash

```
curl -X PATCH http://localhost:5000/api/patients/{{id}} \
  -H "Content-Type: application/json" \
  -d '{
    "firstName": "Rita",
    "phone": "9876543211",
    "address": "456 New Road, Surat",
    "bloodGroup": "O+",
    "occupation": "Doctor",
    "maritalStatus": "MARRIED",
    "note": "Updated note"
  }'
```

Update Patient with New Profile Image (multipart)

bash

```
curl -X PATCH http://localhost:5000/api/patients/{{id}} \
  -F "firstName=Rita" \
  -F "phone=9876543211" \
  -F "profileImage=@/path/to/newphoto.jpg"
```

Delete Patient (soft delete)

bash

```
curl -X DELETE http://localhost:5000/api/patients/{{id}}
```

Book Appointment from Patient Page

bash

```
curl -X POST http://localhost:5000/api/patients/{{id}}/book-appointment \
-H "Content-Type: application/json" \
-d '{
  "date": "2026-05-10",
  "time": "10:30 AM",
  "branch": "MAIN",
  "reason": "Fever and cold",
  "doctorId": null
}'
```

APPOINTMENTS

Get Appointments by Date

bash

```
curl -X GET "http://localhost:5000/api/appointments?date=2026-05-10"
```

Get Appointments by Date + Branch

bash

```
curl -X GET "http://localhost:5000/api/appointments?date=2026-05-10&branch=MAIN"
```

Get Available Time Slots

bash

```
curl -X GET "http://localhost:5000/api/appointments/available-slots?date=2026-05-10"
```

Get Available Time Slots by Branch

bash

```
curl -X GET "http://localhost:5000/api/appointments/available-slots?date=2026-05-10&branch=M
```

Get Single Appointment

bash

```
curl -X GET http://localhost:5000/api/appointments/{{id}}
```

Create Appointment

bash

```
curl -X POST http://localhost:5000/api/appointments \
-H "Content-Type: application/json" \
-d '{
  "patientId": "{{patientId}}",
  "date": "2026-05-10",
  "time": "10:30 AM",
  "branch": "MAIN",
  "reason": "Headache",
  "notes": "First visit",
  "appointmentBy": "In Clinic",
  "isNewPatient": false,
  "doctorId": null
}'
```

Update Appointment

bash

```
curl -X PATCH http://localhost:5000/api/appointments/{{id}} \
-H "Content-Type: application/json" \
-d '{
  "date": "2026-05-11",
  "time": "11:00 AM",
  "branch": "BRANCH_1",
  "reason": "Follow up",
  "notes": "Bring reports"
}'
```

Update Appointment Status

bash

```
curl -X PATCH http://localhost:5000/api/appointments/{{id}}/status \
-H "Content-Type: application/json" \
-d '{
  "status": "CONFIRMED"
}'
```

status options: PENDING CONFIRMED IN CLOSED CANCELLED

Cancel Appointment (quick shortcut)

```
bash

curl -X PATCH http://localhost:5000/api/appointments/{{id}}/cancel
```

APPOINTMENT SETTINGS

Get Settings

```
bash

curl -X GET http://localhost:5000/api/settings/appointment
```

Save / Update Settings

```
bash

curl -X PUT http://localhost:5000/api/settings/appointment \
-H "Content-Type: application/json" \
-d '{
  "morningStartTime": "09:00 AM",
  "morningEndTime": "02:00 PM",
  "afternoonStartTime": "04:00 PM",
  "afternoonEndTime": "08:00 PM",
  "oldPatientTime": 15,
  "newPatientTime": 30,
  "oldPatientFee": 200,
  "newPatientFee": 400
}'
```

Update Working Days

```
bash
```

```
curl -X PUT http://localhost:5000/api/settings/day \
-H "Content-Type: application/json" \
-d '{
  "workingDays": ["Monday", "Tuesday", "Wednesday", "Thursday", "Friday", "Saturday"]
}'
```

Get All Holidays

```
bash

curl -X GET "http://localhost:5000/api/settings/holidays"
```

Get Upcoming Holidays

```
bash

curl -X GET "http://localhost:5000/api/settings/holidays?type=upcoming"
```

Get Past Holidays

```
bash

curl -X GET "http://localhost:5000/api/settings/holidays?type=past"
```

Create Holiday (Full Day Off)

```
bash

curl -X POST http://localhost:5000/api/settings/holidays \
-H "Content-Type: application/json" \
-d '{
  "title": "Diwali",
  "date": "2026-10-20"
}'
```

Create Holiday (Partial Hours)

```
bash
```

```
curl -X POST http://localhost:5000/api/settings/holidays \
-H "Content-Type: application/json" \
-d '{
  "title": "Holi",
  "date": "2026-03-25",
  "morningTime": "09:00 AM - 12:00 PM",
  "afternoonTime": "04:00 PM - 06:00 PM"
}'
```

Update Holiday

```
bash

curl -X PUT http://localhost:5000/api/settings/holidays/{{id}} \
-H "Content-Type: application/json" \
-d '{
  "title": "Diwali Updated",
  "date": "2026-10-21",
  "morningTime": null,
  "afternoonTime": null
}'
```

Delete Holiday

```
bash

curl -X DELETE http://localhost:5000/api/settings/holidays/{{id}}
```

BOOK APPOINTMENT

Lookup Patient by File ID

```
bash

curl -X GET "http://localhost:5000/api/book/lookup?fileId=AH-00001"
```

Book for Old Patient

```
bash
```

```
curl -X POST http://localhost:5000/api/book/old-patient \
-H "Content-Type: application/json" \
-d '{
  "fileId": "AH-00001",
  "date": "2026-05-10",
  "time": "10:30 AM",
  "branch": "MAIN",
  "reason": "Routine checkup",
  "notes": "",
  "appointmentBy": "In Clinic",
  "doctorId": null,
  "paymentAmount": 200,
  "paymentMethod": "CASH",
  "paymentNotes": ""
}'
```

Book for New Patient (register + book in one step)

```
bash
```

```
curl -X POST http://localhost:5000/api/book/new-patient \
-H "Content-Type: application/json" \
-d '{
  "firstName": "Amit",
  "lastName": "Patel",
  "phone": "9123456780",
  "gender": "MALE",
  "dateOfBirth": "1990-03-10",
  "email": "amit@example.com",
  "address": "Surat, Gujarat",
  "bloodGroup": "A+",
  "branch": "MAIN",
  "occupation": "Engineer",
  "reference": "Walk-in",
  "maritalStatus": "MARRIED",
  "education": "B.Tech",
  "age": 36,
  "date": "2026-05-10",
  "time": "11:00 AM",
  "reason": "First consultation",
  "appointmentBy": "In Clinic",
  "doctorId": null,
  "paymentAmount": 400,
  "paymentMethod": "UPI",
  "paymentNotes": "Paid via GPay"
}'
```

Get Payment History for Patient

bash

```
curl -X GET "http://localhost:5000/api/book/payments/{{patientId}}?page=1&limit=10"
```

PRESCRIPTIONS

Get All Prescriptions

bash

```
curl -X GET "http://localhost:5000/api/prescriptions?page=1&limit=10"
```

Get All Prescriptions — search

bash

```
curl -X GET "http://localhost:5000/api/prescriptions?search=fever"
```

Get Prescriptions for a Patient

bash

```
curl -X GET "http://localhost:5000/api/prescriptions/patient/{{patientId}}?page=1&limit=10"
```

Get Single Prescription

bash

```
curl -X GET http://localhost:5000/api/prescriptions/{{id}}
```

Create Prescription

bash

```
curl -X POST http://localhost:5000/api/prescriptions \
  -H "Content-Type: application/json" \
  -d '{
    "patientId": "{{patientId}}",
    "title": "General Prescription",
    "list": "Follow Up",
    "content": "<p>Belladonna 30 – 3 times a day for 5 days</p>"
  }'
```

Update Prescription

bash

```
curl -X PATCH http://localhost:5000/api/prescriptions/{{id}} \
  -H "Content-Type: application/json" \
  -d '{
    "title": "Updated Prescription",
    "list": "General",
    "content": "<p>Nux Vomica 200 – once daily</p>"
  }'
```

Delete Prescription

bash

```
curl -X DELETE http://localhost:5000/api/prescriptions/{{id}}
```

CASE TAKING

Get Case Taking for Patient

bash

```
curl -X GET http://localhost:5000/api/patients/{{patientId}}/case-taking
```

Create / Update Case Taking

bash

```
curl -X PUT http://localhost:5000/api/patients/{{patientId}}/case-taking \
-H "Content-Type: application/json" \
-d '{
  "historyTakenBy": "Dr. Bhumi",
  "notes": "Patient complains of chronic headache since 2 years.",
  "beforeImages": [],
  "afterImages": []
}'
```

Upload Before / After Images

bash

```
curl -X POST http://localhost:5000/api/patients/{{patientId}}/case-taking/images \
-F "type=before" \
-F "images=@/path/to/before1.jpg" \
-F "images=@/path/to/before2.jpg"
```

bash

```
curl -X POST http://localhost:5000/api/patients/{{patientId}}/case-taking/images \
-F "type=after" \
-F "images=@/path/to/after1.jpg"
```

FOLLOW UPS

Get Follow Up History for Patient

bash

```
curl -X GET "http://localhost:5000/api/patients/{{patientId}}/follow-ups?page=1&limit=10"
```

bash

```
curl -X POST http://localhost:5000/api/patients/{{patientId}}/follow-ups \
-H "Content-Type: application/json" \
-d '{
  "followUp": "Patient reports 60% improvement in headache",
  "weight": "65 kg",
  "bp": "120/80",
  "appointmentCharge": 200,
  "historyTakenBy": "Dr. Bhumi",
  "remedy": "Belladonna",
  "dosage": "3 drops",
  "repetition": "TDS",
  "potency": "30C",
  "days": "7",
  "prescriptionType": "Liquid"
}'
```

Get Remedy History for Patient

bash

```
curl -X GET "http://localhost:5000/api/patients/{{patientId}}/follow-ups/remedy-history?page=1&limit=10"
```

INVOICES

Get Invoices for Patient

bash

```
curl -X GET "http://localhost:5000/api/patients/{{patientId}}/invoices?page=1&limit=10"
```

Create Invoice

bash

```
curl -X POST http://localhost:5000/api/patients/{{patientId}}/invoices \
-H "Content-Type: application/json" \
-d '{
  "diagnosis": "Chronic Migraine",
  "prescriptionDate": "2026-05-10",
  "prescription": "Belladonna 30 TDS x 7 days",
  "amount": 500
}'
```

Get Single Invoice (for printing)

```
bash

curl -X GET http://localhost:5000/api/patients/{{patientId}}/invoices/{{invoiceId}}
```

Delete Invoice

```
bash

curl -X DELETE http://localhost:5000/api/patients/{{patientId}}/invoices/{{invoiceId}}
```

MATERIA MEDICA

Get All Entries

```
bash

curl -X GET "http://localhost:5000/api/materia-medica?page=1&limit=10"
```

Search Materia Medica

```
bash

curl -X GET "http://localhost:5000/api/materia-medica?search=belladonna"
```

Get Single Entry

```
bash

curl -X GET http://localhost:5000/api/materia-medica/{{id}}
```

Create Entry

```
bash
```

```
curl -X POST http://localhost:5000/api/materia-medica \
-H "Content-Type: application/json" \
-d '{
  "code": "BELL",
  "productName": "Belladonna",
  "potency6CH": "Available",
  "potency30CH": "Available",
  "potency200CH": "Available",
  "potency1M": "Available"
}'
```

Update Entry

```
bash

curl -X PATCH http://localhost:5000/api/materia-medica/{{id}} \
-H "Content-Type: application/json" \
-d '{
  "potency1M": "Not Available"
}'
```

Delete Entry

```
bash

curl -X DELETE http://localhost:5000/api/materia-medica/{{id}}
```

Import from CSV

```
bash

curl -X POST http://localhost:5000/api/materia-medica/import \
-F "file=@/path/to/materia-medica.csv"
```

EVENTS

Get All Events

```
bash

curl -X GET "http://localhost:5000/api/events?page=1&limit=10"
```

```
bash
```

```
curl -X GET "http://localhost:5000/api/events?isPublished=true"
```

Search Events

```
bash
```

```
curl -X GET "http://localhost:5000/api/events?search=seminar"
```

Get Single Event

```
bash
```

```
curl -X GET http://localhost:5000/api/events/{{id}}
```

Create Event

```
bash
```

```
curl -X POST http://localhost:5000/api/events \
-H "Content-Type: application/json" \
-d '{
  "title": "Homoeopathy Awareness Camp",
  "type": "Camp",
  "organizeBy": "Dr. Bhumi Shah",
  "description": "Free consultation and medicines for all",
  "date": "2026-06-15",
  "time": "09:00 AM",
  "location": "Surat, Gujarat",
  "isPublished": true
}'
```

Update Event

```
bash
```

```
curl -X PATCH http://localhost:5000/api/events/{{id}} \
-H "Content-Type: application/json" \
-d '{
  "title": "Updated Camp Name",
  "time": "10:00 AM",
  "location": "Adajan, Surat"
}'
```

Toggle Publish / Unpublish

bash

```
curl -X PATCH http://localhost:5000/api/events/{{id}}/toggle-publish
```

Delete Event

bash

```
curl -X DELETE http://localhost:5000/api/events/{{id}}
```

RESEARCH & DEVELOPMENT

Get All R&D Entries

bash

```
curl -X GET "http://localhost:5000/api/research-dev?page=1&limit=10"
```

Search R&D

bash

```
curl -X GET "http://localhost:5000/api/research-dev?search=diabetes"
```

Get Single R&D Entry

bash

```
curl -X GET http://localhost:5000/api/research-dev/{{id}}
```

Create R&D Entry

bash

```
curl -X POST http://localhost:5000/api/research-dev \
-H "Content-Type: application/json" \
-d '{
  "title": "Homoeopathy in Diabetes Management",
  "descriptionTitle": "Study Overview",
  "description": "A detailed study on how homoeopathy helps manage blood sugar levels.",
  "image": ""
}'
```

Update R&D Entry

bash

```
curl -X PATCH http://localhost:5000/api/research-dev/{{id}} \
  -H "Content-Type: application/json" \
  -d '{
    "title": "Updated Title",
    "description": "Updated description content"
  }'
```

Delete R&D Entry

bash

```
curl -X DELETE http://localhost:5000/api/research-dev/{{id}}
```

CLINIC INFORMATION

Get All Clinics

bash

```
curl -X GET "http://localhost:5000/api/clinics?page=1&limit=10"
```

Search Clinics

bash

```
curl -X GET "http://localhost:5000/api/clinics?search=surat"
```

Get Single Clinic

bash

```
curl -X GET http://localhost:5000/api/clinics/{{id}}
```

Create Clinic

bash

```
curl -X POST http://localhost:5000/api/clinics \
-H "Content-Type: application/json" \
-d '{
  "title": "Antara Homoeopathy Main Clinic",
  "address": "123 Healing Street, Adajan, Surat - 395009",
  "contact": "9876543210",
  "officeType": "Main Office",
  "location": "Adajan, Surat"
}'
```

Update Clinic

```
bash

curl -X PATCH http://localhost:5000/api/clinics/{{id}} \
-H "Content-Type: application/json" \
-d '{
  "contact": "9876500000",
  "address": "456 New Street, Surat"
}'
```

Delete Clinic

```
bash

curl -X DELETE http://localhost:5000/api/clinics/{{id}}
```

 QUICK REFERENCE — All Endpoints

Method	Endpoint	Description
GET	<code>/api/health</code>	Health check
GET	<code>/api/dashboard</code>	Full dashboard
GET	<code>/api/dashboard/appointments/today</code>	Today's appointments
PATCH	<code>/api/dashboard/appointments/:id/status</code>	Update status
GET	<code>/api/dashboard/holidays</code>	All holidays
GET	<code>/api/dashboard/events</code>	Upcoming events
GET	<code>/api/patients</code>	All patients (paginated)

Method	Endpoint	Description
POST	<code>/api/patients</code>	Create patient
GET	<code>/api/patients/:id</code>	Single patient
PATCH	<code>/api/patients/:id</code>	Update patient
DELETE	<code>/api/patients/:id</code>	Delete patient
POST	<code>/api/patients/:id/book-appointment</code>	Book appointment
GET	<code>/api/appointments</code>	Appointments by date
GET	<code>/api/appointments/available-slots</code>	Available slots
POST	<code>/api/appointments</code>	Create appointment
GET	<code>/api/appointments/:id</code>	Single appointment
PATCH	<code>/api/appointments/:id</code>	Update appointment
PATCH	<code>/api/appointments/:id/status</code>	Update status
PATCH	<code>/api/appointments/:id/cancel</code>	Cancel
GET	<code>/api/settings/appointment</code>	Get settings
PUT	<code>/api/settings/appointment</code>	Save settings
PUT	<code>/api/settings/day</code>	Update working days
GET	<code>/api/settings/holidays</code>	All holidays
POST	<code>/api/settings/holidays</code>	Create holiday
PUT	<code>/api/settings/holidays/:id</code>	Update holiday
DELETE	<code>/api/settings/holidays/:id</code>	Delete holiday
GET	<code>/api/book/lookup</code>	Lookup patient by fileId
POST	<code>/api/book/old-patient</code>	Book old patient
POST	<code>/api/book/new-patient</code>	Register + book new
GET	<code>/api/book/payments/:patientId</code>	Payment history
GET	<code>/api/prescriptions</code>	All prescriptions

Method	Endpoint	Description
POST	<code>/api/prescriptions</code>	Create prescription
GET	<code>/api/prescriptions/patient/:patientId</code>	By patient
GET	<code>/api/prescriptions/:id</code>	Single prescription
PATCH	<code>/api/prescriptions/:id</code>	Update prescription
DELETE	<code>/api/prescriptions/:id</code>	Delete prescription
GET	<code>/api/patients/:patientId/case-taking</code>	Get case taking
PUT	<code>/api/patients/:patientId/case-taking</code>	Upsert case taking
POST	<code>/api/patients/:patientId/case-taking/images</code>	Upload images
GET	<code>/api/patients/:patientId/follow-ups</code>	All follow ups
POST	<code>/api/patients/:patientId/follow-ups</code>	Create follow up
